RAPID EXTRACTION FROM A HOSTILE ENVIRONMENT

The Xtract®SR is designed for personnel who evacuate seriously injured casualties from hostile environments.

LIGHTWEIGHT - The Xtract®SR weighs less than 7lbs, allowing for easy deployment into the operational area.

MODULAR - A system that gives the operator control of configuration and selection.

ADAPTABLE - A stretcher that is designed to fit casualties of all heights and casualties with compromised anatomy.

ENHANCED PATIENT CARE - Cocooned in Xtract®SR, in under 30 seconds, your casualty is secure, protected and insulated.

COMPONENTS
XTRACT®SR Stretcher
XTRACT®SR Base
XTRACT®SR Bag
XTRACT® Straps

Padded skid sheet protects the casualty from the terrain

Lightweight & tough Duraelite fabric

Innovative casualty securing system

Multifunctional straps

Detachable, high abrasion skid sheet

Multifunctional straps
**MEETING OPERATIONAL REQUIREMENTS**

**MADE TO SURVIVE**

Developed specifically for our Xtract® range of stretchers, Duraelite fabric provides the lightweight, abrasion and tear resistant fabric structure which allows Xtract®SR to survive the operational environment.

A detachable and replaceable insulated skid sheet allows for extended drag extractions while considering your casualties need for protection, insulation and comfort.

**PUTTING CARE FIRST**

Xtract®SR uses unique systems to ensure the head and neck is kept in a more neutral position, reducing flexion during a drag extrication.

Elasticated bungee straps and wide entry carabiners allow for the casualty to be quickly secured without restricting their respiration.

Head and foot length reduction cords allow for a secure casualty fit that helps minimise movement and secondary injury.

---

“Rapid casualty extraction often becomes the key link in the chain of survival.”

Dr. John Hall MB CHB, DRCOG, DFSRH, DIMC RCS ED

---

*Xtract®SR is a lightweight, compact rescue litter designed for rapid extraction of the seriously injured casualty from a hostile environment. Xtract®SR gives the operator a modular approach which can be configured depending on your operational parameters.*

Enhanced patient care is at the forefront of our extraction device, providing a platform that will cocoon your casualty and reduce movement, helping to protect critical interventions and reduce secondary injury. Your casualty will be secure, well insulated and ready to transfer to a safe location using drag, lift or hands-free techniques.
